Käesolev nimekirjaraamat R13, pealkirjaga „Eestist küüditatud, arreteeritud, tapetud ja mobiliseeritud 1940-1990“ hõlmab inimeste andmeid lühikirjetena raamatutest R8/1, R8/2, R9, R10, R11 ja R12, ühises tähestikulises järjekorras, kokku 93 561 isikut. Iga isik on üks lühikirjerida. Seega meil on 6 nimekirjaraamat R8/1-R12 koondregister ehk lühidalt koondregister R13.

Koondregister R13 raamatut R8/1-R12 on järg varem ilmunud koondregistrile R7, raamatutest R1-R6. Kõik raamatud R1, R2, R3, R4, R5, R6, R7, R8/1, R8/2, R9, R10, R11, R12 on Memento ERRB nimekirjaraamatud. Lühend ERRB on **Eesti Represseeritute Registri Büroo**. ERRB kuulub Eesti Memento Liidu Tallinna Memento Ühenduse koosseisu iseseisva allüksusena.

Koondregistrisse R13 kuuluvad isikute lühi andmed alljärgnevatest raamatutest:

- **Lisanimestik R8/1** raamatute R1-R7 täiendamiseks 856 leheküljel, kokku 17 420 isiku kirjet aastatest 1940-1990.
- **Lisanimestik R8/2** raamatute R1-R7 täiendamiseks 412 leheküljel, kokku 5811 uue isiku kirjet, aastatest 1940-1990.
- **Eestlased vene sõjaväes 1940-1945, R9**. Sundmobiliseeritud tööpataljonides, 1. osa A-L, 800 leheküljel, kokku 22 794 isikut nimede tähestikulises järjekorras, täiskirjetena.
- **Eestlased vene sõjaväes 1940-1945, R10**. 2. osa M-Sel, 797 leheküljel, kokku 21 860 isikut nimede tähestikulises järjekorras, täiskirjetena.
- **Eestlased vene sõjaväes 1940-1945, R11**. 3. osa Sel-Ü, 640 leheküljel, kokku 16 748 isikut nimede tähestikulises järjekorras, täiskirjetena.

This name list book R13 titled “Persons deported, arrested, killed or mobilised in Estonia, 1940-1990” contains concise entries about the people listed in books R8/1, R8/2, R9, R10, R11 and R12, arranged in joint alphabetical order and totalling 93,561 persons. There is one concise entry line for each person. Therefore, this R13 book is a consolidated register for six name list books, R8/1-R12.

*This R13 consolidated register for name list books R8/1-R12 is a continuation of the previously published consolidated register R7 for books R1-R6. All books – R1, R2, R3, R4, R5, R6, R7, R8/1, R8/2, R9, R10, R11 and R12 – are name list books by Memento’s ERPRB. ERPRB denotes the **Estonian Repressed Persons Records Bureau**. The ERPRB is an independent unit in the Tallinn Memento Association of the Estonian Memento Union.*

The R13 consolidated register contains concise details of the persons listed in the following books:

- **Additional name list R8/1** supplementing books R1-R7, 856 pages, with a total of 17,420 personal entries from 1940-1990.
- **Additional name list R8/2** supplementing books R1-R7, 412 pages, with a total of 5,811 personal entries from 1940-1990.
- **Estonians in Russian armed forces 1940-1945, R9**. Forcibly mobilised in labour battalions, part 1, A-L, 800 pages, totalling 22,794 persons arranged in alphabetical order, full entries.
- **Estonians in Russian armed forces 1940-1945, R10**. Part 2, M-Sel, 797 pages, totalling 21,860 persons arranged in alphabetical order, full entries.
- **Estonians in Russian armed forces 1940-1945, R11**. Part 3, Sel-Ü, 640 pages, totalling 16,748 persons arranged in alphabetical order, full entries.

- **Eestlased vene sõjaväes 1940-1945, R12**, lisanimeslik A-Ü raamatute R9-R11 täiendamiseks, 659 leheküljel, kokku 12 811 isikut nimede tähestikulises järjekorras, täiskirjetena.

Raamatute R8/1-R12 bibliograafilisi andmeid vaata iga nimekirjaraamatu lõpuosa peatükis Väljaannete seeria.

Eesti Represseeritute Registri Büroo (ERRB) on kasutusel isikuandmete kirjutamiseks andmete komplektid nimetusega **täiskirje** ja **lühikirje**. Täiskirje sisaldab üle 20 andmeparameetri: perekonnanimi, eesnimi, isanimi, sünniaeg, sünnikoht, elukoht, haridus, eriala, abikaasa, laste arv, repressioonid (küüditamine, arreteerimine, mobiliseerimine), kohtuotsus, kinnipidamiskoht, surma tähis †, vabanemine kinnipidamiskohast, vanemate nimed, nende haridus, nende repressioonid. Lühikirjes on vaid 5-7 andmeparameetri: perekonnanimi, eesnimi, isanimi, sünniaasta, surma tähis †, registri (nimistute) tähised.

Ühte lühikirjetega koondregistrisse mahub 6 täiskirjetega nimekirjaraamatut. Ühine tähestikuline isikute andmete järjestamine koondregistri nimekirjas soodustab nii korduvnimede töötlemist kui ka vajaliku konkreetse isiku andmete leidmist. Ei teki vajadust isiku andmete otsimiseks mitmest raamatust. **Koondregistri R13** ühes tähestikulises registris (nimekirjas) on kokku 93 560 isiku andmed. Ekslikult korduvate isikute andmed on kergesti avastatavad kuna need peavad paiknema nimekirjas lähedastikku. **Eelmises koondregistris R7** ühines tähestikulises nimekirjas on 87 035 isiku andmed lühikirjetena. Kaks koondregistrit hõlmavad nimekirjaraamatud R1-R12, lühikirjetena kokku 87 035 + 93 560 = **180 595 Eestist represseeritud isikute lühiaandmeid**.

1941. aastal Saksa väed jõudsid Riiga juba 2. Juulil. Taganevate Punaarmee üksuste, NKVD vägede ja hävituspataljoni poolt tapeti Eestis üle 2000 inimese. **1941. aasta suvesõjas** võideldes kommunistidega võtsid Eesti metsavendade salgad Kagu -ja Lõuna Eestis võimu enda kätte, enamvähem omal jõul, enne Saksa vägede saabumist. Metsavendade arvuks loetakse 25 000-35 000 inimest, kellest pooled olid relvastatud ja võitlesid aktiivselt. Juulis 1941 alustati vabastatud (kommunistidest) aladel Eesi omakaitse (OK) formeerimist metsavendade baasil. Kaitseliidu eeskujul toimus omakaitse formeerimine vabatahtlikkuse alusel. 1. septembriks 1941 oli OK-s ligi 25 000 meest. Loodi esimesed improviseeritud väeüksused. Metsavendadena langes, tapeti vangistamisel ja kadus teadmata Herbert Lindmäe suvesõja uurimistöode järgi 1056 eestlast. Eesti Omakaitse andmetel sooritati 1941. aastal taanduvate punaväelaste ja hävituspataljoni bandiitlike jõukude vastu kokku 5033 haarangut. Selle tulemusena vahistati 21 003 punaväelast ja 5632

- **Estonians in Russian armed forces 1940-1945, R12**, additional name list A-Ü supplementing books R9-R11, 659 pages, totalling 12,811 persons arranged in alphabetical order, full entries.

Bibliographic data of R8/1-R12 books can be viewed in the section titled "Series of publications" at the end of each name list book.

The Estonian Repressed Persons Records Bureau (ERPRB) uses **full entry** and **concise entry** data sets to list personal details. A full entry contains over 20 data parameters: surname, first name, patronymic, date of birth, place of birth, place of residence, education, profession, spouse, number of children, repression instances (deportation, arrest, mobilisation), court sentence, detention location, death marked with †, release from detention location, names of parents, their education, their repression instances. A concise entry contains only 5-7 data parameters: surname, first name, patronymic, year of birth, death marked with †, register (name list) codes.

One consolidated register of concise entries covers six name list books of full entries. Application of joint alphabetical order to the personal entries in the consolidated register facilitates both processing of recurrent entries and finding necessary individual details. The reader does not have to look for a person's details across several books. **This R13 consolidated register** has one register (name list) in alphabetical order totalling 93,560 personal entries. Mistakes in the form of recurrent entries are easily discoverable as they occur in close proximity due to joint alphabetical order. **The previous R7 consolidated register** has one register in alphabetical order totalling 87,035 concise personal entries. The two consolidated registers cover R1-R12 name list books and contain a total of 87,035 + 93,560 = **180,595 concise entries about repressed persons from Estonia**.

In 1941, the German forces reached Riga on 2 July. Retreating Red Army units, NKVD squads and extermination battalions murdered more than 2,000 people in Estonia. **In the summer fighting of 1941**, bands of Forest Brothers rebelled against the Communist regime and managed to assume power in the south and south-east of Estonia, mostly relying only on their own strength before the arrival of the German forces. The total number of Forest Brothers in that period is estimated to have been between 25,000 and 35,000, with only half being armed and actively engaged in combat. In July 1941, establishment of the volunteer Home Guard consisting mostly of Forest Brothers began in the areas of Estonia liberated from the Communists. Just as the Estonian Defence League prior to that, the Home Guard was a volunteer organisation. As

hävituspatalljonidesse kuulunud meest. 1941. aasta lõpuks oli Eestis Omakaitse üksustes registreeritud kokku 43 757 meest.

Memento ERRB-s on lõpetamisel nimekirjaraamatud ühisel teemal pealkirjaga "Eestlased Soome ja Saksa sõja-aäes 1940-1945". Nendest on ilmunud nimekirjaraamatud R14, R15, R16 ja töötlusel on lisanimestik R17 (A-Ü), kõik täiskirjetena. Nimetatud neli nimekirjaraamatut lühikirjetena mahuvad **kavandavasse kolmandasse koondregistrisse**. Seega 3ndasse Memento koondregistrisse lülitatakse nimekirjaraamatute R14-R17 isikute põhiaandmed:

- R14, kus on 14 039 täiskirjet nimede algtähtedega A-J;
- R15, kus on 20 629 isiku nimede algtähtedega K-L;
- R16, kus on 22 571 isiku nimed algtähtedega M-Y;
- R17 töötlusel seisuga detsember 2021. aastal, lisanimekirjana A-Ü üle 5000 isiku täiskirje. Täiskirjete üleviimisel lühikirjeteks toimub korduvkirjete töötlemisel isikuandmete kokkulükkamine ja seega isikuarvu vähenemine ligi 4%. Kolmandasse koondregistrisse tulevad isikuandmed nimekirjaraamatutest R14, R15, R16 ja R17 ehk isikute arvudega $(14\,039 + 20\,629 + 22\,571 + 5000) \times 0,96 = 59\,749$ lühikirjet vähemalt. Nimekirjaraamatusse R17 andmete otsimine ja sisestamine jätkub.

of 1 September 1941, the Home Guard had approximately 25,000 members. The first local improvised military units appeared. Around 1,056 Forest Brothers in Estonia perished fighting, were killed in captivity or went missing, according to Herbert Lindmäe's research of the summer fighting of 1941. According to the Home Guard, a total of 5,033 raids on the retreating gangs of Red Army servicemen and extermination battalion members were conducted in 1941. Those actions resulted in the capture of 21,003 Red Army servicemen and 5,632 extermination battalion members. By the end of 1941, the Home Guard units in Estonia had a total of 43,757 registered men.

*Memento's ERPRB is completing a series of name list books dedicated to Estonians in Finnish and German armed forces in 1940-1945. The R14, R15 and R16 name list books have already been published. The R17 (A-Ü) additional name list is being processed. All these books contain full entries. Personal details from these four name list books in the form of concise entries will be included in **the planned third consolidated register**. Thus Memento's third consolidated register will contain the main details about the persons included in name list books R14-R17:*

- *R14 with 14,039 full entries, surnames beginning with A-J;*
- *R15 with 20,629 full entries, surnames beginning with K-L;*
- *R16 with 22,571 full entries, surnames beginning with M-Y;*
- *R17 being processed as of December 2021, additional name list A-Ü, full entries for over 5,000 persons. When full entries are transformed into concise entries, some recurrent entries are discovered and processed together, resulting in an approximately 4% reduction in the number of the listed persons. The third consolidated register will contain personal details from name list books R14, R15, R16 and R17, so at least $(14,039 + 20,629 + 22,571 + 5,000) \times 0.96 = 59,749$ concise entries. The team continues searching for and adding data into the R17 name list book.*

3.1. THE FOUR STATISTICAL TABLES

Leo Õispuu

Nimekirjaraamatu R13 statistika 2 tabelit ja tabelite juurde kuuluvad graafikud hõlmavad andmeid lühikirjetena. Need andmed on avaldatud Memento nimekirjaraamatutes R8/1 ja R8/2 pealkirjaga „Kommunismi kuriteod Eestis. Lisanimestik 1940-1990.“ ja raamatutes R9, R10, R11 ja R12 pealkirjaga „Eestlased Vene sõjavees 1940-1945“.

Tabel 1: Isikute arv ühises tähestikulises lõikes hõlmab 93 560 isikut.

Järeldused statistika kahest tabelist

Perenimede arvuline jaotumine algustähtede alusel on eesti nimedele tüüpiline. Kõige enam perenimesid algab (A-Ü ulatuses) algustähega K (14 538), tähega P (9197) ja tähega T (8542).

Tabel 2: „Sünniaastad“ hõlmab 74 709 isiku andmeid ja moodustab 79,85% töödeldud isikute arvust ulatuses A-Ü. 18 851 isiku kohta sünniaasta puudub, kuid on teada vanus aastates, sõjaväkke värbamise aastakäik või mobilisatsiooni aeg.

Raamatu R13 statistika tabelites ja graafikutes on esitatud andmed, mis koguti ja töödeldi kuni 2021. aasta lõpuni

Andmete arvutitöötlus ja graafikud Raul Juurma'lt.

The 2 tables with the accompanying charts in name list book R13 cover concise entry data. The data was published in Memento name list books R8/1 and R8/2 titled “Communist crimes in Estonia. Additional name list 1940-1990” and R9, R10, R11 and R12 titled “Estonians in Russian armed forces in 1940-1945”.

Table 1: Numbers of persons in alphabetical order – covers 93,560 people.

Conclusions drawn from the two tables

The numerical distribution of surnames by the first initial is typical for Estonian surnames. Most surnames in the A-Ü range begin with K (14,538), P (9,197) and T (8,542).

Table 2: Years of birth – covers 74,709 people, comprising 79.85% of the processed persons in the A-Ü range. No year of birth is available for 18,851 people, but one of the following is known in such cases: the person’s age in years, army recruitment year or mobilisation time.

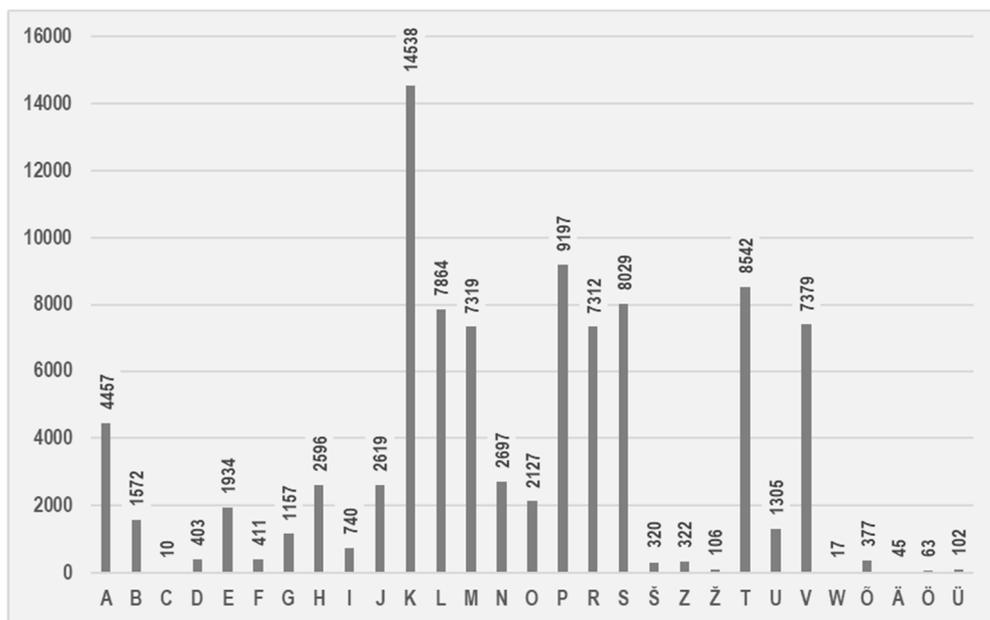

The R13 statistical tables and charts contain data that was collected and processed until the end of 2021.

Data computer processing and charts by Raul Juurma.
